

## Spam Jam Promotion 2009 - end users get 30% off\*

\*Valid until June 30 2009

### Who qualifies?

Any end user who can show proof of purchase for a valid Symantec Mail Security, Brightmail, or Message Lab license qualify for this promotion.

Our reseller partners can now offer end users 30% off on all Barracuda Spam Firewall hardware products with the purchase of a 3 year subscription when trading in a Symantec Mail Security, Brightmail or Message Labs License for similar number of locations or users.

As long as the end user is trading in the appropriate amount of licenses, the end user may take discount on as many Barracuda Spam Firewalls as they need in order to protect their appropriate end user community. Customers must have approximately the same number of Symantec Mail Security, Brightmail or Message Labs licensed users as they are purchasing of Barracuda.

### 4 simple rules

The end user must show valid license key, expiration date, and proof of purchase. The end user must order 3 years of Energize Updates. The Spam Jam 2009 promotion CAN NOT be combined with any other promotion or discount being offered by Barracuda. The order must be submitted with the additional 30% discount at time of ordering.

### Reseller Partners

Resellers apply their standard reseller discount against the promotional end user price (30% off) instead of list price. Resellers must pass on promotional end user pricing to the end users.
